DETAILED ACTION: Final Rejection

Response to Arguments

1. Applicant's arguments with respect to claims 1, 3-5, 7, 10-12, 14-18, 21, 22, and 25-32 have been considered but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 3-5, 7, 10-12, 14-18, 21, 22, and 25-32 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Independent claims 1, 10, 15, and 22 contain a negative limitation concerning repeating operations "without rebooting the system", which is not described in the Applicant's Specification. The dependent claims are rejected based upon their respective dependence to claims 1, 10, 15, and 22.

Conclusion

3. The Examiner would like to comment on the interpretation of the novelty of the Applicant's invention. After consideration of all relevant prior art and in light of the Applicant's Specification, the Examiner feels that the main novelty of the Applicant's invention is presented through (1) repeating of isolation and diagnostic testing of multiple memory devices and (2) the initial isolation and diagnostic testing, as well as the repetition, occurring within the same BIOS utility session.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent 6,862,695 Lin discloses testing of multiple memories via BIOS.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Contino whose telephone number is (571) 272-3657. The examiner can normally be reached on Monday-Friday 9:00 am - 6:00 pm.
